CloudBacko App

CloudBacko app is introduced to backup and restore data on mobile devices that will provide flexible access to prevent the risk of damaging or losing data due to accident or disaster

Supported Android and iOS version:

- Android 8 and later
- iOS 12.0 and later

Key features:

CloudBacko app allows you to:

- Back-up and restore your photos, videos and documents
- Back-up and restore your CloudBacko 2FA profiles
- Choose from the supported backup destinations:
 - CloudBacko Pro, Lite, and Home machine – *Windows or macOS*
 - Cloud Destinations
- Choose from multiple Restore options:
 - Original mobile device – *Android / iOS*
 - Restore to another device
- Automatically back-up newly added photos, videos, documents and 2FA profiles
- Stop and Resume backup and restore
- Retains Exchangeable Image File Format (EXIF)
- Supports common file types of photos and videos such as: .jpg, .png, .bmp, .gif, .mp4, .mov, .avi, .flv etc.

Mobile App Settings

To access the Settings, tap More. These are the following settings:

- **Automated backup**
Allows you to enable or disable the automation of the backup process.
- **Backup while charging only**
Allows you to enable or disable the backup while charging.
- **Power saving mode**
Allows you to enable or disable the power saving mode that will hold the backup when battery is low.
- **Enhanced security for 2FA**
Allows you to enable, disable, or access/unlock the 2FA page using password or biometric.

For more information, check the full version of [CloudBacko App v1 User Guide for Android and iOS – Chapter 6.4.4: Enhanced Security for 2FA](#).

- **Free up space**
Allows you to enable or disable the free up space that will optimize the available storage space on your mobile device.

For more information, check the full version of [CloudBacko App v1 User Guide for Android and iOS – Chapter 6.4.5: Free up space](#)

- **Language**
Allows you to choose a language.
- **Help**
 - **Contact Us**
Displays the contact number, e-mail address, website, and social media accounts of CloudBacko.
 - **FAQ**
Displays the Frequently Asked Questions.
 - **App Log**
Displays the activity logs.
 - **Version**
Displays the version of the installed CloudBacko app.

Installing CloudBacko App

Install the latest version of CloudBacko app from the App Store or Play Store.

How do I install from Play Store?

1. Go to Google Play Store app.
2. Search CloudBacko or use this [link](#).
3. Tap Install.

How do I install from App Store?

1. Go to App Store app.
2. Search CloudBacko or use this [link](#).
3. Tap Get.
4. Tap Install.
5. Input Apple password then tap Sign In or use Touch ID by placing your enrolled fingerprint on the Touch ID sensor.

For more information, check the full version of [CloudBacko App v1 User Guide for Android and iOS – Chapter 4: Download and Install CloudBacko App](#)

Registering your mobile device

Register your device for mobile backup and restore on CloudBacko Pro, Lite, or Home.

How do I register my mobile device?

1. Open CloudBacko Pro, Lite, or Home, go to Settings > Mobile Backup then click Add or migrate device.
2. Select Add new device for backup without migration.
3. Download CloudBacko app from Google Play Store or App Store.
4. Scan QR Code using the CloudBacko app – go to Backup. Tap Activate and start backup.
5. QR Code is detected, tap OK to proceed.

For more information, check the full version of [CloudBacko App v1 User Guide for Android and iOS – Chapter 7: Register device for Mobile Backup and Restore](#)

Migrating from an original to replacement device

Register your device for mobile backup and restore on CloudBacko Pro, Lite, or Home and migrate old mobile settings to the replacement device.

How do I register and migrate my mobile device?

1. Open CloudBacko Pro, Lite, or Home, go to Settings > Mobile Backup then click Add or migrate device.
2. Select Migrate backup content of existing device to a new device.
3. Choose an original device then click Next.
4. Download CloudBacko app from Google Play Store or App Store.
5. Scan QR Code using the CloudBacko app – go to Backup. Tap Activate and start backup.
6. QR Code is detected, tap OK to proceed.
7. Replacement device paired successfully, and migration of contents is completed.

For more information, check the full version of [CloudBacko App v1 User Guide for Android and iOS – Chapter 7: Register device for Mobile Backup and Restore](#)

Backing up photos, videos, documents and 2FA accounts to CloudBacko machine

Back-up your photos, videos, documents and 2FA accounts to CloudBacko Pro, Lite, or Home machine.

To back-up your photos, videos, documents and 2FA accounts to CloudBacko machine:

1. Register your mobile device.
2. Start CloudBacko app.
3. Go to Backup.
4. [Optional step] Tap Settings icon to modify your backup source.
 - a. Tap Photos, Videos, Document and/or 2FA Accounts as the backup source.
 - b. Make sure to select at least one from Photos, Videos, Document or 2FA Accounts.
5. Tap Backup.
6. [Optional step] Stop and Resume backup.
 - a. Tap Stop to pause the backup.
 - b. Tap Resume to continue the backup.

For more information, check the full version of [CloudBacko App v1 User Guide for Android and iOS – Chapter 10: Running Backup Job](#)

Backing up photos, videos, documents and 2FA accounts to supported Cloud destinations

Back-up your photos, videos, documents and 2FA accounts to our supported Cloud destinations such as: Amazon S3, Dropbox, Google Drive, Microsoft Azure, and many more.

To back-up your photos, videos, documents and 2FA accounts to Cloud destinations:

1. Register your mobile device.
2. Back-up photos, videos, documents and 2FA accounts to CloudBacko machine.
3. Open CloudBacko Pro, Lite, or Home, create a backup set.
 - a. Go to Backup Sets then click Add new backup set.
 - b. Select File Backup as backup set type then input backup set name.
 - c. Browse and select the mobile backup destination as backup source.
 - d. [Optional step] On or Off the Schedule.
 - e. Choose from the supported Cloud destinations.
 - f. [Optional step] On or Off the OpenDirect.
 - g. [Optional step] On or Off the Encryption.
 - h. Input Windows User Authentication – Domain name, Username, and Password.
4. Run Backup job
 - a. Select a backup set.
 - b. [Optional step] On or Off Migrate Data.
 - c. [Optional step] On or Off Retention Policy.
 - d. Click Backup.
